Report N° 32
Implementation of the Agreement on Movement and Access
(24 January – 6 February 2007)

The United Nations¹ is submitting the 32nd bi-weekly report on the implementation of the 15 November 2005 Agreement on Movement and Access (AMA), covering the period 24 January – 6 February 2007 inclusive.²

1. Overall Progress:

The operation of Rafah crossing continues to be poor. Opening for only 7 hours on 1 day during this period resulted in the lowest overall traveller through-flow since September 2006. The number of export truckloads increased by 19% over the previous period although the operation of Karni crossing continues to fall below the AMA target. The number of senior traders crossing Erez into Israel continues to increase although it remains closed for workers.

2. Changes of note since Report No 31 (23 January):

- **Rafah crossing** was open on only 1 day allowing a total of 578 people to cross into the Gaza Strip and 901 people out. Rafah was open for 4% of scheduled hours compared to 11% during the previous period.
- **Karni crossing** was open on 11 out of 12 scheduled operating days enabling a total of 2,668 truckloads of goods into (same as the previous period) and 583 truckloads of goods out (a 19% increase) of the Gaza Strip. In addition 1,996 truckloads of aggregates were imported.³ Karni was open for 46% of scheduled hours.
- **Sufa crossing** was open all 12 scheduled working days for the import of aggregates.
- **Kerem Shalom crossing** was open on 1 day.
- **Erez crossing** remains closed to all Palestinians except traders holding special permits and emergency humanitarian cases. An average of 280 traders are crossing Erez each day, up from 253 last period.
- **Obstacles to movement in the West Bank** increased to 529. This represents an increase of 165 or 41% over the baseline figure of August 2005.

3. No Change since Report No 31 (23 January):

- There were **no reported security incidents** in the areas of the crossings during the period.

Convoys between the Gaza Strip and the West Bank:

Truck convoys no discussion; implementation now 13½ months overdue.

Bus convoys no discussion; implementation now 14½ months overdue.

Ports:

Seaport awaiting, since November 2005, GoI assurance to donors that it will not interfere with its operation.

Airport awaiting, since November 2005, commencement of discussions.

¹ The Office of the Quartet's Special Envoy closed on 28 April. Since then the United Nations through the oPt OCHA office has assumed reporting responsibilities on the implementation of the AMA.

² The report draws on all available data sources for reporting including the EU-BAM, UN agencies, PA ministries, PalTrade, COGAT and the World Bank.

³ Aggregates are construction materials that are primarily moved through Sufa crossing.

a: Karni and Sufa are scheduled to open six days a week (closed on Saturdays). There are no scheduled operating hours at Kerem Shalom.

b: The actual working hours per day (ave.) is calculated on the basis of actual days open i.e. 11 days for Karni and 14 days for Erez.

All other averages are calculated on the basis of scheduled days open.

c: Ratio of actual vs. planned working hours of scanners and cells.

d: There were no reported security incidents during the reporting period.

e: Karni was open on 11 days. Actual operating hours varied between 2 hours and 8.5 hours.

f: Total truckloads of exported goods was 583 during the reporting period. The daily average number of trucks is calculated on the basis of scheduled days open i.e. 12 (source: PalTrade).

g: Total truckloads of imports during reporting period was 2,668. (In addition 1,996 truckloads of aggregates were imported through Karni). The daily average number of trucks is calculated on the basis of scheduled days open i.e. 12 (source: PalTrade).

h: Kerem Shalom and Sufa may operate as alternative commercial crossing points when Karni is closed. Kerem Shalom is used for humanitarian goods and Sufa for aggregates (construction materials).

i: Erez is open for limited number of senior traders with permits: according to the MoNE, permits are only being granted to senior traders who are at least 35 years old and married with children. Some critical Palestinian humanitarian cases have been permitted to cross subject to prior coordination with the IDF.

Technical notes to the Report on the Implementation of the Agreement on Movement and Access

The AMA is primarily concerned with the movement of Palestinians and commercial goods traffic into and out of the Gaza Strip. However there is also movement of humanitarian workers and goods across some of the checkpoints which is included in some of the figures. To clarify the reporting figures an explanation of the AMA report for each crossing follows:

1. **Rafah.** There are two parts to the AMA:
 - a. *personnel movement* into and out of Egypt. The AMA reports the crossing open only when it is open for Palestinian ID card holders. Others may cross with prior agreement. The AMA report reports only Palestinian ID card holder movement. The crossing was opened by 25 November, as scheduled in the AMA. It is monitored by the EU Border Assistance Mission (EU BAM).
 - b. *commercial goods traffic* export to Egypt. To date there has been no movement of commercial goods through Rafah.
The EU-BAM monitors are based in Israeli and travel to Rafah via Kerem Shalom when Israeli security concerns allow for both Rafah and Kerem Shalom to be open.
2. **Karni.**
 - a. *commercial goods traffic.* Karni is the primary crossing point for commercial goods into and out of the Gaza Strip. The crossing point is reported open if it is open for imports *and/or* exports. The AMA states that the number of trucks passing through Karni out of the Gaza Strip should be 150 by the end of 2005 rising to 400 by the end of 2006. Thus the scheduled figure in the table on p3 is set at 150 (the agreed minimum now) but the graphical representation of the target in the trend analysis (p6) shows a dotted line rising to 400 by December.
 - b. *personnel movement* to and from Israel/the West Bank. Karni is a back up for personnel movement (for use when Erez is closed). Thus there are no scheduled working days.
 - c. *humanitarian goods.* Karni is also a crossing point for humanitarian goods into the Gaza Strip. The truckloads of 'goods in' reported on p2 include both commercial and humanitarian goods. In future reports an attempt will be made to distinguish humanitarian from commercial goods.
3. **Erez.**
 - a. *personnel movement* (workers and traders) to and from Israel/the West Bank. Erez is the primary crossing point for goods into and out of the Gaza Strip. Medical cases may cross with prior agreement but are not reported in the AMA report.
 - b. *commercial goods traffic* to and from Israel/the West Bank. Erez is a back up for commercial goods movement (for use when Karni is closed). Thus there are no scheduled working days.
 - c. *humanitarian movement.* International humanitarian staff may cross with prior agreement but are not included in the AMA reports.
4. **Sufa.**
 - a. *commercial goods specifically aggregates* for construction, although other commercial goods may be imported to the Gaza Strip through Sufa periodically. Sufa is reported as 'open' only when open for aggregates.
Sufa is reported as 'open' whenever it is open for aggregates, other commercial goods or humanitarian goods. There are no scheduled opening days or hours in the AMA.
5. **Kerem Shalom.**
 - a. *humanitarian goods.* Kerem Shalom is an alternative entry point for humanitarian goods.
 - b. *commercial goods traffic* to and from Israel/the West Bank. The Palestinian Authority have refused to accept Kerem Shalom as an alternative commercial crossing point as it is located in Israel. Kerem Shalom is reported as 'open' whenever it is open for humanitarian goods. There are no scheduled opening days or hours in the AMA.

6. General

The '**number of days experiencing a closure**' is actually the number of days that a checkpoint is completely closed for reasons other than a mutually agreed holiday. The agreement does not define a 'closure'. Where a checkpoint is closed for only a few hours during the day (or opens late/closes early) it is recorded as 'open'.
